Charging your battery

- Please charge fully before first use.
- To charge, connect the device to a compliant USB port via the cable supplied.
- Typical charge time for this unit is 45 minutes.
- A full charge will typically provide 6 hours of logging.
- Do not leave battery in depleted state for extended periods of time as battery damage may occur.
- When not in use disconnect the unit from the charger to prevent battery drain.

Tips

- For best performance use your SPT in a location with a clear view of the sky. Avoid use around large obstacles e.g. trees or tall buildings.
- **This device is not waterproof and should be protected from moisture.**
